About Me

Final-year B.Tech CSE student at RKGIT, Ghaziabad with hands-on experience in quality auditing, content/data consistency checks, and full-stack (MERN) development. Strong analytical and problem-solving foundation with 350+ DSA problems solved across LeetCode and CodeChef.

Skills

Core CS: Data Structures & Algorithms, OOP, Complexity Analysis, DBMS, Operating Systems

Languages: C, Java, Python, JavaScript, SQL

Data & Analytics: MS Excel (Pivot Tables, Charts), Power BI

Systems: Linux (User Commands), Unix

Frontend: React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MongoDB Atlas

DevOps: Docker, AWS

Tools: Git, GitHub, Postman, VS Code

Education

B.Tech – Computer Science & Engineering

RKGIT, Ghaziabad (AKTU)
2023 – 2027
CGPA: 7.8/10 (till 6th sem)

Achievements

- LeetCode Top 18% globally | 150+ problems solved
- CodeChef max rating 1850 | 200+ problems solved
- Finalist – Binary Hacks 2026 (Team CosmicNerds)
- Finalist – Bharatiya Antariksh Hackathon 2026 (Team CosmicNerds)
- Contributed to 3+ open-source projects on GitHub

Experience

IT INTERN

July 2026 Present

NPTI (National Power Training Institute), Faridabad | Hybrid

- Conducted a comprehensive QA audit of npti.gov.in, identifying 35+ bugs, broken links, and content inconsistencies to improve overall site data quality
- Reviewed site content against GIGW 3.0 (Guidelines for Indian Government Websites) compliance standards and assisted in aligning structure accordingly
- Identified mismatches in URLs and content between Hindi and English versions, ensuring consistency across multilingual page catalogs

TECHNICAL INTERN

Part time

CATI AI, Gurgaon | Remote

- Working on real-world projects involving AI, automation, REST APIs, and web scraping for structured data pipelines
- Building and testing backend service integrations with structured tool-calling patterns, validating data flow accuracy for an AI agent system

Projects

ALGORITHM VISUALIZER

Tech: React, TypeScript, Vite, Tailwind CSS, GSAP, Anime.js

- Built an interactive visualizer for 7 sorting algorithms (Bubble, Selection, Insertion, Merge, Quick, Heap, Counting) with real-time animations at 60 FPS
- Implemented multi-language code display (JS, Java, Python) with **Big-O complexity analysis** for each algorithm
- **GitHub:** github.com/Shivansh-04/sort-scape-animations
- **Live:** sortingvisualizer-zeta.vercel.app

OPTIONS PRICING ENGINE

Tech: React, Vite, Node.js, Express, MongoDB, JWT, Recharts

- Built a full-stack fintech app using MERN stack for real-time options pricing and analysis
- Implemented Black-Scholes model, all 5 Greeks, and Monte Carlo simulation (10,000 paths) in pure Node.js — zero external math libraries, applying numerical/optimization methods at scale
- Features JWT auth, MongoDB Atlas, interactive Payoff Diagram and Option Chain visualizations using Recharts
- **GitHub:** github.com/Shivansh-04/Options-Engine
- **Live:** options-engine-red.vercel.app

PORTFOLIO WEBSITE

Tech: React, Vite, Tailwind CSS, Framer Motion, Anime.js

- Built a personal portfolio with a Japanese manga/anime aesthetic featuring custom cursor, scroll animations and chapter-based navigation
- Implemented 3.6s intro animation, ink-splash transitions and RPG-style skills section with S/A/B rank badges
- **GitHub:** github.com/Shivansh-04/shivansh-portfolio
- **Live:** www.iamshivansh.in
